

NeXtract Professional™

Report Data Extraction Application

Convert reports to spreadsheets in seconds!

Make your information manageable with NeXtract!

NeXtract Professional™ is a report data extraction application that reads your computer-generated reports and converts them to live data in a database, spreadsheet, or web page. All you have to do is print your report to a disk file instead of on paper. NeXtract reads that report and applies a data extraction template to convert the print characters into data fields. The data extractions can be automated, so a single click of the mouse does the report-to-spreadsheet transformation instantly. After the report extraction is complete, the data can be manipulated as desired.

NeXtract Pro Report View

NeXtract

A product of Electronic Storage Corporation

NeXtract Pro is easy to use and is guaranteed to save you time and money. Paper distribution problems are eliminated with built-in SMTP email support for emailing databases and spreadsheets as attachments. Learning the program is simple with online help files and manuals. NeXtract can be easily integrated with LaserVault Enterprise Report Archiving, or can be used as a stand-alone program. NeXtract is the affordable alternative to the repetitive, tedious task of hand-keying data into spreadsheets or databases.

Increase productivity, efficiency, and gain a competitive advantage with NeXtract.

- Eliminate paper distribution problems by emailing databases and spreadsheets as attachments!
- Multi-colored highlighting of fields makes determining field data types easy.
- 40 character field names, multiple field sorting, and page break options allow for maximum flexibility.
- Report data can be manipulated in other applications such as Excel, Access, and dBase.
- Seamless integration with LaserVault Universal Client creates a complete information management system
- Powerful SQL-based filtering and record selection increases reliability.
