

Compare for Yourself

Using Virtual Tape vs Manual Tape for Backup & Recovery of IBM Power Systems

Compare the Facts

Virtual Tape Backups

Physical Tape Backups

Reduced management time and manual labor	✓	no
Shortest backup windows save time	✓	no
Fastest recovery speeds - easily restore your data	✓	no
Automated backups streamline operations	✓	no
Built-in AES 256 encryption & compression	✓	no
Allows users more access time	✓	no
Easy remote backups - no need to be onsite with your servers	✓	no
Easy implementation = IMMEDIATE ROI	✓	no
Low risk of physical media failure	✓	no
Easy to restore to off-site facility	✓	no
Unlimited file size acceptable; fully scalable	✓	no
Gateway option to dedupe appliances	✓	no
Data encrypted at rest and while in transit	✓	no
More secure with more layers with less cost	✓	no
Eliminate shipping costs to offsite location	✓	no
Simple to archive and manage backups	✓	no
Vendor-generic for dedupe and cloud systems - works with all	✓	no
Automatically replicate backups to offsite location for DR protection	✓	no
Peace of mind knowing backups are complete & secure	✓	no

Using virtual tape and tape libraries allows you to greatly simplify, strengthen and speed-up your IBM i backup and recovery.
